

EcoPeps

IDENTITY SYSTEM v1

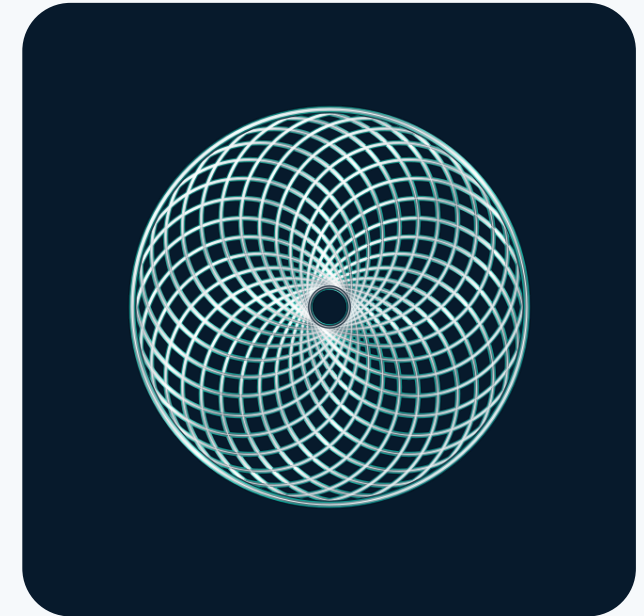

Geometry with scientific clarity.

A display signature, a precise vector sibling, and a responsive micro mark.

The torus is the signature

Eco**P**eps

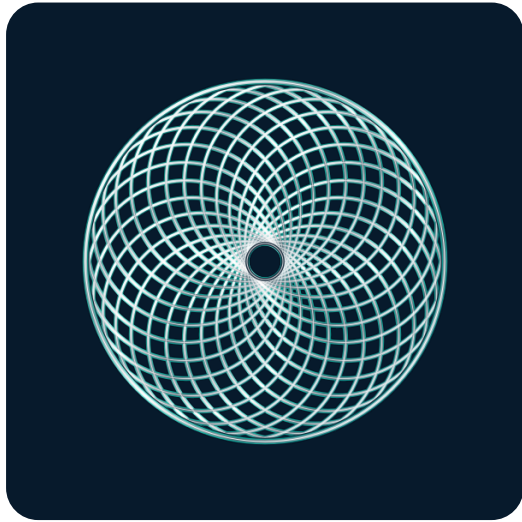

The approved photoreal artwork remains the hero signature for large digital placements. The controlled vector rebuild carries the same straight-on torus, small central aperture, silver/teal material cue, and navy/teal wordmark into scalable production.

RETAIN

Straight-on view • 10% aperture • teal capital P • jewelry-like wire structure

One identity, three detail levels

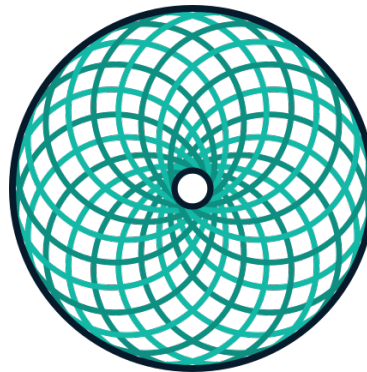

Select by reproduction size, not personal preference.

DISPLAY

28 loops + metallic finish

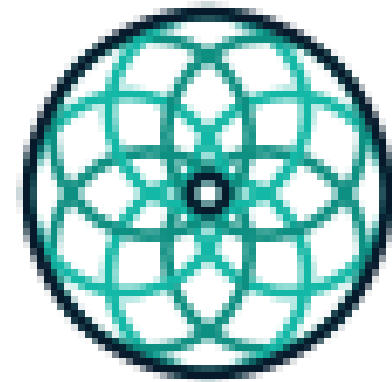

≥ 360 px / ≥ 45 mm

FLAT

20 loops + two-color linework

40–359 px / 10–44 mm

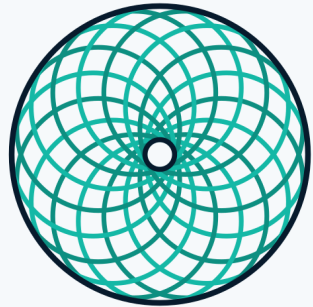

MICRO

8 loops + reinforced strokes

16–39 px

Use the display mark for brand moments, the flat mark for routine interface and print, and the micro mark for favicons and tiny UI. This separation protects the same idea at every scale.

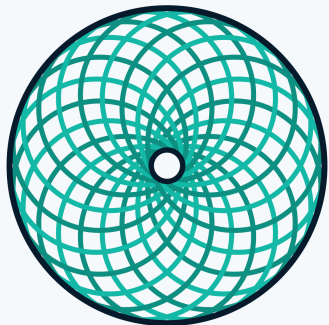

Primary configurations

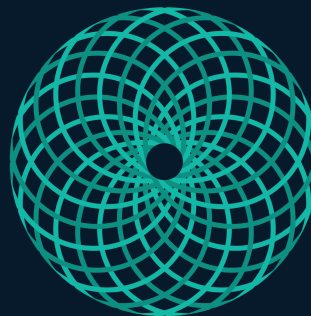

EcoPeps

EcoPeps

EcoPeps

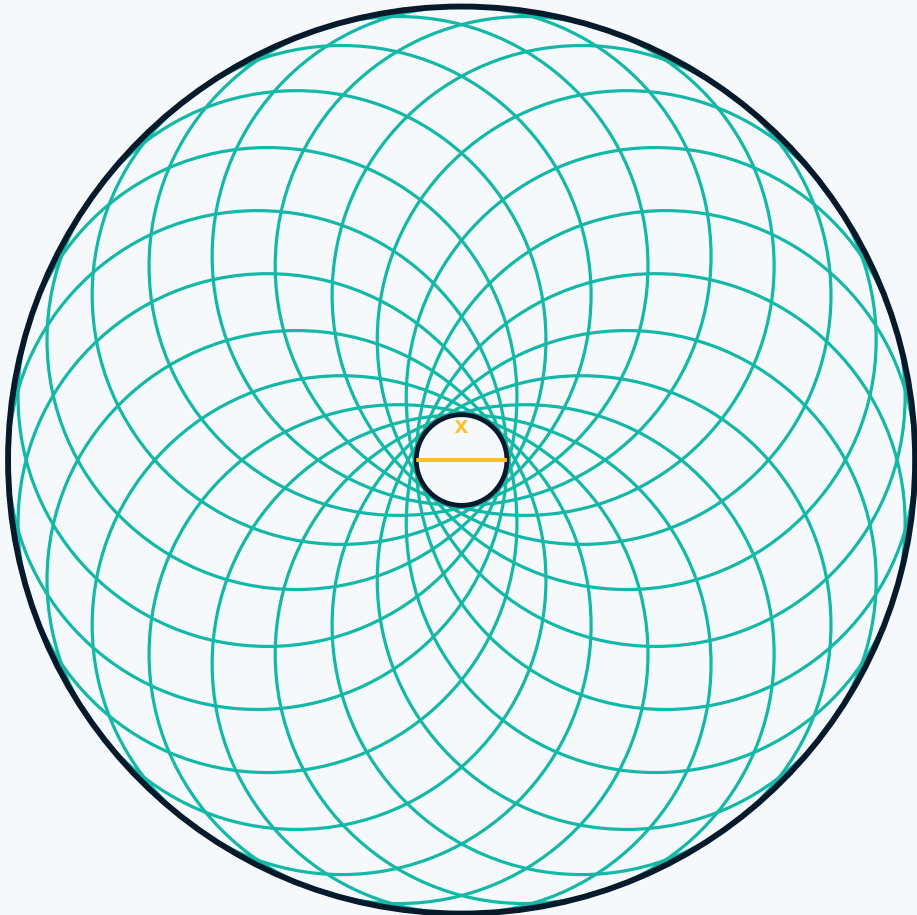

EcoPeps

Selection

- DISPLAY** Hero, social, launch graphics
- COMPACT** Header, navigation, documents
- STACKED** Square fields and centered layouts
- ICON** Avatar, app tile, favicon

The approved aperture is locked

Center opening diameter = 10% of the full torus diameter.

10x

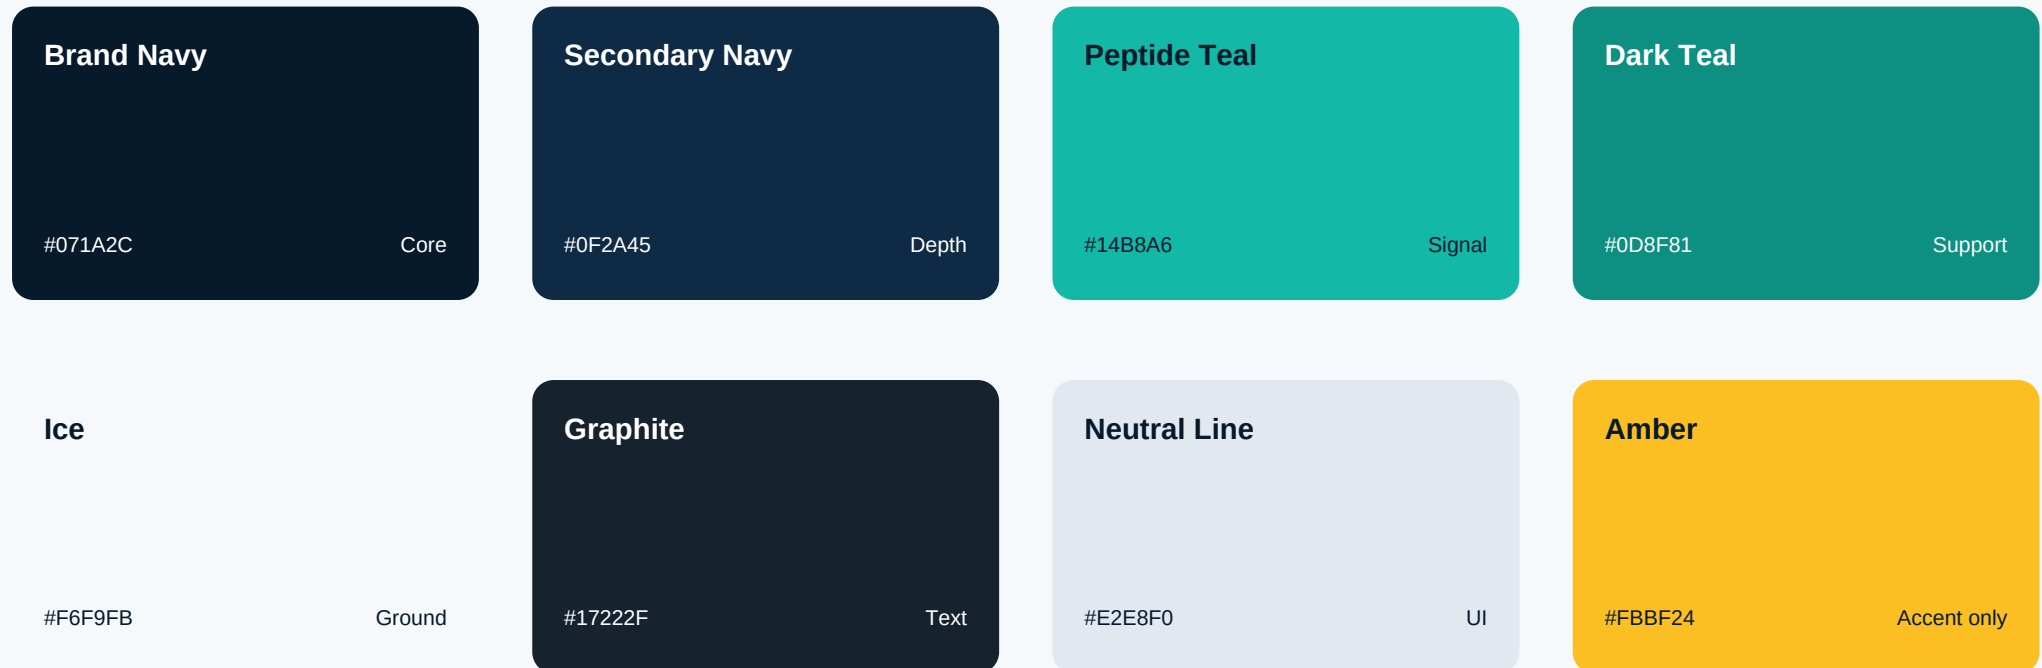

Construction

Outer radius	R
Opening radius	0.10R
Loop radius	0.55R
Center orbit	0.45R
Display loops	28
Flat loops	20
Micro loops	8

Never enlarge the aperture independently. Change the entire responsive variant when more clarity is required.

Website-aligned palette

Core identity colors match the ecopeps.com visual system.

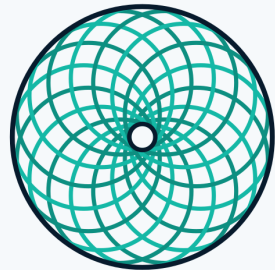

Production values

Navy RGB 7/26/44 • CMYK 84/41/0/83 Teal RGB 20/184/166 • CMYK 89/0/10/28 Ice RGB 246/249/251 • CMYK 2/1/0/2

Contrast: Navy on Ice 16.65:1 • White on Navy 17.60:1 • Teal on Navy 7.07:1 • Dark Teal on Ice 3.77:1

Reserve amber for calls to action and highlights; keep it outside the core logo artwork.

Protect recognition

EcoPeps

x = diameter of the central aperture

Minimum sizes

Display signature

360 px / 45 mm

Compact lockup

140 px / 25 mm

Flat torus

40 px / 10 mm

Micro torus

16 px minimum

Keep at least 1x clear space on every side. Increase it in editorial or premium applications.

Backgrounds and misuse

LIGHT

Avoid

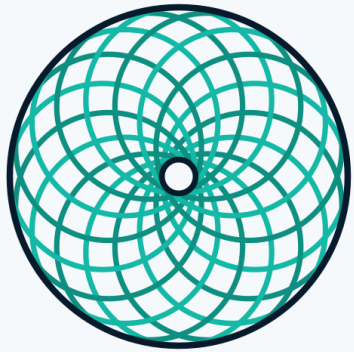

- ✗ Stretching or compressing the torus
- ✗ Recoloring individual loops
- ✗ Using the detailed mark below 40 px
- ✗ Rotating the lockup

DARK

- ✗ Changing the 10% aperture
- ✗ Adding drop shadows to the dark version
- ✗ Placing the logo over high-detail photography
- ✗ Using amber inside the mark

A clinical, confident voice

EcoPeps

EcoPeps

Distinctive detail

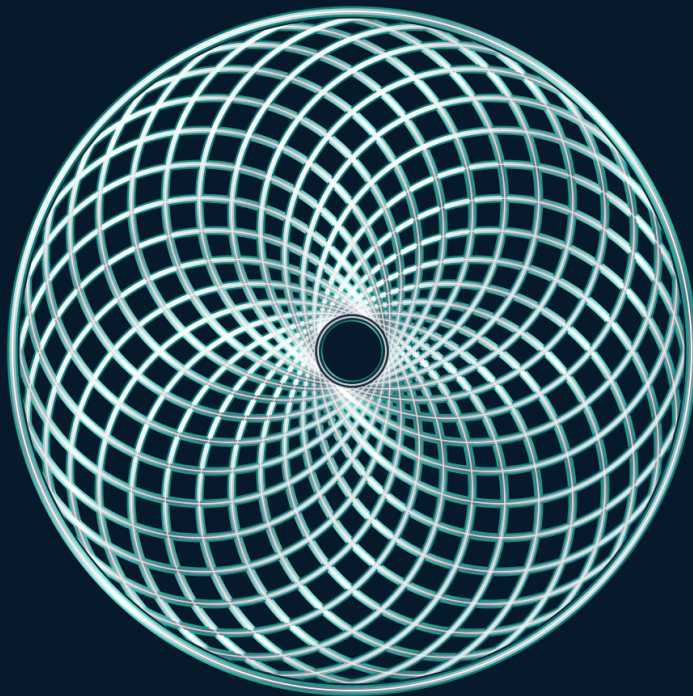

The teal capital P is the customized wordmark cue. It creates a clean visual hinge between ecology and peptides without introducing a decorative symbol.

Supporting typography

Use Geist on the website where it is already present. Use a neutral grotesk such as Helvetica, Arial, or Nimbus Sans in production systems that lack Geist. Never typeset the logo from a live font; use the outlined vector artwork.

Motion stays subtle

The animated SVG adds a restrained specular sweep and respects reduced-motion preferences.

Digital handoff

Header	Compact SVG
Hero	Metallic SVG or approved PNG
Avatar	Flat 512 PNG/SVG
Favicon	Micro 16/32/48 PNG + ICO
Motion	Animated SVG, 12 s loop
Fallback	Static detailed SVG

Load the static logo first. Treat motion as enhancement, not identity-bearing information.

Print and vial-label use

40 × 20 mm lockup

The label variant uses 12 loops and flat colors for clean reproduction. It retains the 10% opening and removes metallic detail that cannot survive small-format printing.

Handoff files

SVG	Preferred editable master
PDF	Print placement
EPS / .ai	Legacy Illustrator-compatible vectors
PNG 600 dpi	Raster fallback / proofing

Request a physical proof for foil, metallic ink, shrink sleeves, and very absorbent stocks. Use the flat mark for all one-color, embossed, etched, or screen-printed applications.

Name review: proceed with caution

Design-stage knock-out only; not legal clearance.

Exact verbal overlap found

An INRAE / Université de Caen ecology team uses “EcoPEPS.” A French business listing also uses ECOPEPS for advertising, marketing, and packaging services. These exact overlaps make a professional class-by-class search important before packaging investment or filing.

Next legal pass

- Search ECOPEPS, ECO PEPS, ECO-PEPS, ECOPEP, ECO PEPTIDE, and ECOPEPTIDES.
- Review Classes 1, 5, 35, and 42 with trademark counsel.
- Run device-mark image similarity on the torus artwork.
- Obtain a registrability and freedom-to-use opinion before filing or packaging spend.
